Advantages Of Online Market

- 24*7 availability
- Saves time
- Saves money
- Availability of the required product
- Availability of recent trends
- Globalization of market

What are we trying to solve?

- Local shopkeepers are not able to sell out their goods.
- Number of customers that rely on local shops are in a sharp decline.
- The customers are even unaware of the existence of shops in their locality.
- The old stocks are not even sold out , so they are not able to afford for a new stock.

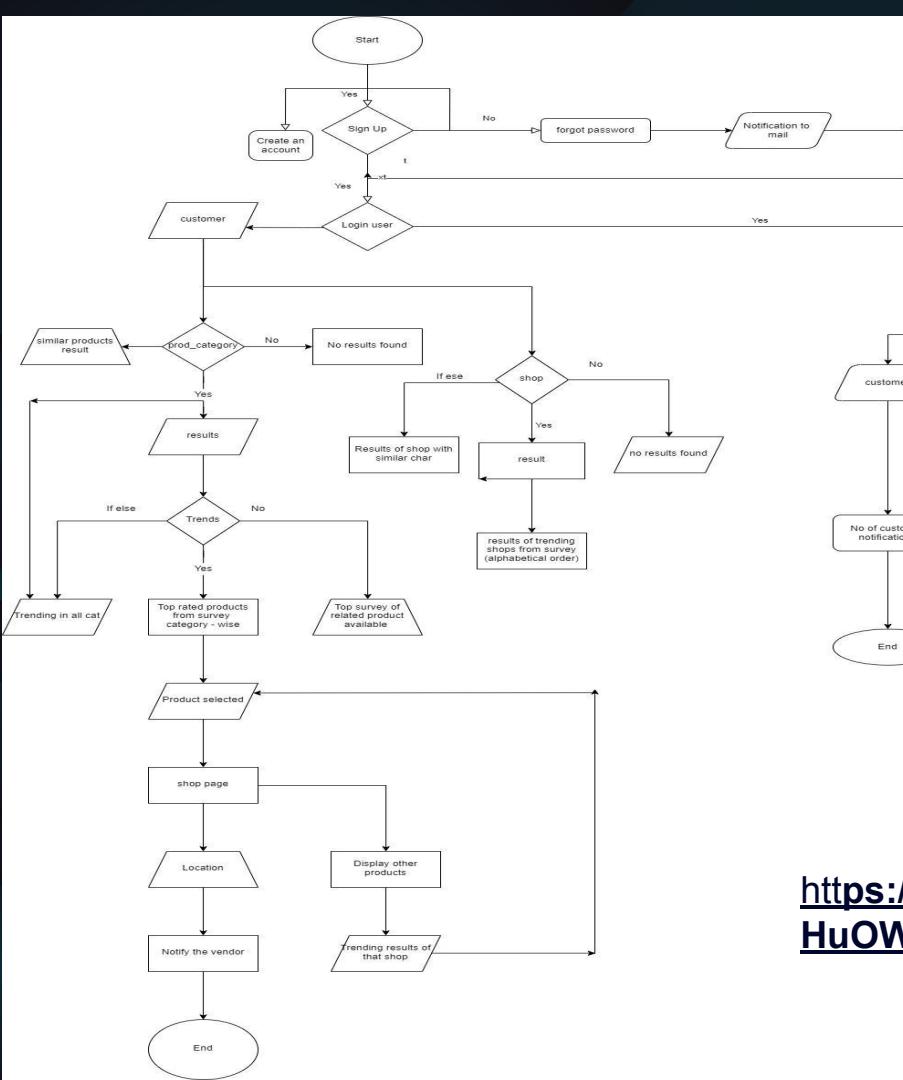

Why are Brick And Mortar shopping still preferred?

- Feel and touch the material
- Quality assurance
- No shipping difficulties
- Ready in hand
- No delay
- Trustworthy
- Can maintain a personal bond with the local shopkeeper

Solution

- The website collects data from the APIs of different applications and analyzes the current trends in the market.
 - If the website is able to make the shopkeepers updated of latest trends and let the customers know of its existence , they will be attracted to the shops , thus increasing their sales.
 - If the shop is familiar to a customer and if they finds it trustworthy they would often approach these local shops, without even considering about online markets.
